Table of Contents

Abstract	1
Acknowledgements	2
List of Figures	3
List of Tables	4
1. Introduction	5
1.1 Backpropagation Algorithm	5
1.1.1 Activation Functions	6
1.1.2 Learning Rate and Momentum	7
1.1.3 Batch/Online Learning	8
1.1.4 Training the Neural Network	9
1.2 Genetic Algorithm (GA)	10
1.2.1 Roulette Wheel Selection	11
1.2.2 Crossover	12
1.2.3 Mutation	13
1.3 Combining Neural Networks and Genetic Algorithms (GA-NN)	14
2. Problem Description	16
2.1 Letter Recognition Dataset	16
2.1.1 Formatting Dataset	16
2.1.2 Training Dataset	17
3. Design	19
3.1 NN Design	19
3.1.1 Initialization of Neural Network	19
3.1.2 Stopping Conditions	20
3.1.3 NN Setup	22
3.2 GA Design	23
3.2.1 Encoding and Decoding	23
3.2.2 Choosing a Fitness Function	23

3.3 Overall GA-NN Design	24
4. C++ Implementation	25
4.1 Formatting Data	26
4.1.1 Splitting	29
4.1.2 Shuffling	29
4.2 NN	29
4.2.1 Feed-forward operation	30
4.2.2 Backpropagation	31
4.2.3 Train the NN	32
4.3 GA	37
4.3.1 Generation of Chromosomes	37
4.3.2 Roulette Wheel Selection	38
4.3.3 Crossover	38
4.3.4 Mutation	39
5. Testing and Evaluation	41
5.1 Preliminary Results	41
▪ Effect of Scaling Factor for the Weights	41
▪ Effect of Learning Rate	42
▪ Effect of Momentum	43
5.2 Experiments	44
▪ Run 1: Standard Run	44
▪ Run 2: Varying the number of GA Generations	44
▪ Run 3: Varying amount of BP Training Epochs/Generation	44
▪ Final Run: Test using the generalization set	44
5.3 Results and Discussion	45
▪ Results from Standard Run	45
▪ Effect of Varying the number of GA Generations	47
▪ Effect of Varying amount of BP Training Epochs/Generation	48
5.3 Final Optimal Setup	49

6. C++ Source Code	50
6.1 Formatting Data	50
6.2 BPNN Code/Libraries	50
6.3 GA Code/Libraries	50
6.4 Main Program	51
6.5 Running the program	51
7. Conclusions & Future Work	52
8. References	53
Appendix A Complete C++ Source Code	54
